Learning Objectives & content

Class Objectives

- Understand what is SAP Build Work Zone

- What are the benefits

- SAP Work Zone Standard edition

- SAP Work Zone Advanced edition

- Go to the system

What is SAP Build Work Zone

- SAP Build Work Zone is part of the new SAP Build portfolio, which was announced at SAP TechEd 2022.

- SAP Build is a unified low-code solution portfolio which empowers users to create applications, automate tedious processes, and design engaging business sites with drag-and-drop simplicity.

- SAP Build brings together SAP Build Apps, SAP Build Process Automation, and SAP Build Work Zone, into a unified development experience with new innovations to rapidly build apps, automate processes, and create business sites.

- SAP Build Work Zone is part of the SAP Build family, running on SAP Business Technology Platform multi-cloud environment.

Automate processes — SAP Build Process Automation

Design business sites — SAP Build Work Zone

Build Visually
Integrate Seamlessly
Collaborate Securely

SAP Business Technology Platform

SAP Build Work Zone vs. SAP Launchpad

- SAP Build Work Zone is a service on SAP BTP bringing together SAP Launchpad service and SAP Work Zone into a unified solution with a coherent and intuitive user experience with two editions:

- SAP Build Work Zone, standard edition (formerly known as SAP Launchpad service)

- SAP Build Work Zone, advanced edition (formerly known as SAP Work Zone)

- Starting with SAP Teched 2022 SAP Work Zone was rebranded to SAP Build Work Zone, advanced edition and SAP Launchpad service to SAP Build Work Zone, standard edition.

- Development team is currently working on harmonizing step-by-step standard and advanced edition of SAP Build Work Zone (regarding user experience, content model, mobile experience etc.), and we have also a future focus on a simplified upgrade path from the standard to the advanced edition.
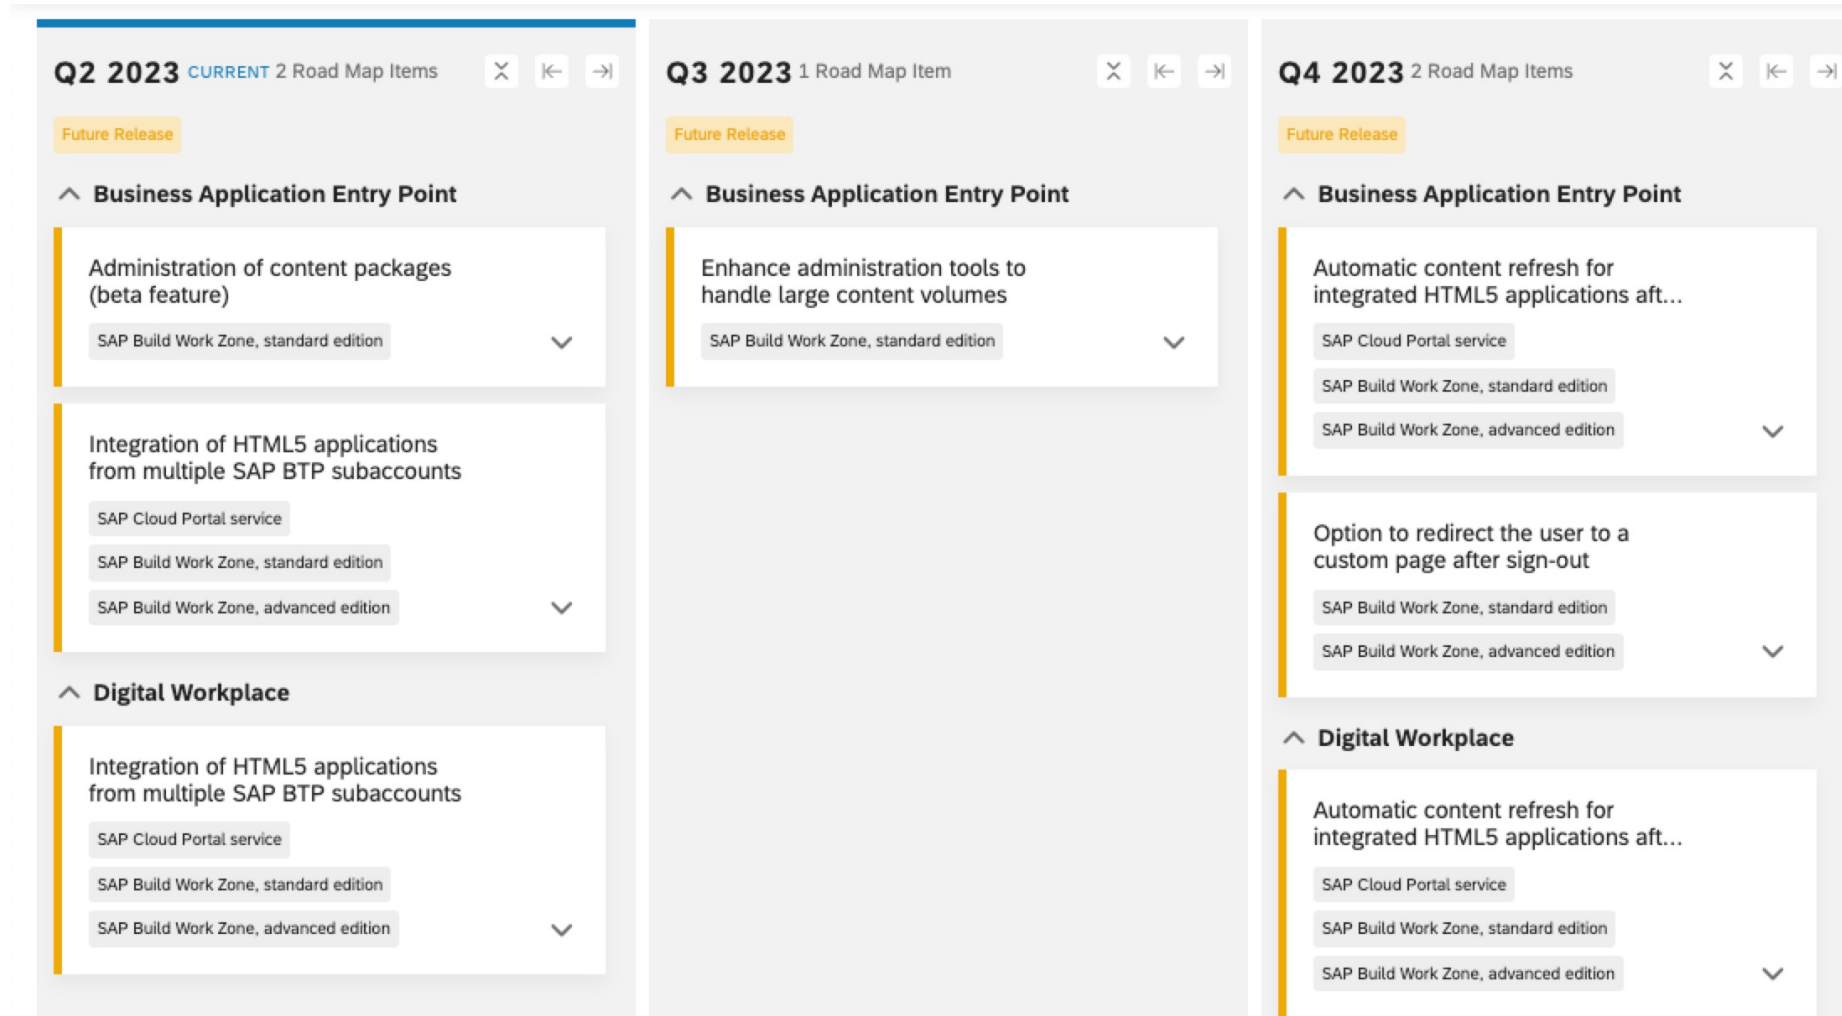

SAP Build Work Zone – For what it's worth?

- When asked about typical challenges in their everyday work-life, employees often mention that they struggle to find the relevant information they are looking for, having to spend too much time switching between business applications or not even finding the relevant application they need to accomplish a given task.

- Complex enterprise technology landscapes lead to sub-optimal user experiences that are heterogeneous and fragmented across a vast number of content types, UI tools, IT systems, content repositories, applications, and channels.

- SAP Build Work Zone offers a solution to this problem. It enables companies, IT departments and employees to improve this situation by bringing it all together and making it easier to consume. SAP Build Work Zone delivers consistent and engaging user experiences across all channels, business processes, and applications.

SAP Build Work Zone – Standard Edition

- SAP Build Work Zone, standard edition (formerly known as SAP Launchpad service) provides a central access point to multiple SAP cloud & on-premise systems, integrating apps and providing customizations and extensions.

- A new set of capabilities is currently available in beta status only, it is planned to become generally available in 2023: you will enjoy a fresh and modern user experience with major enhancements in the area of navigation (with pages and workspace), visualization (UI Integration Cards), page building and pre-packaged business content. In the next slide you can find the current roadmap for more info.

- As of 12th January 2023 "SAP Launchpad service" was rebranded to "SAP Build Work Zone, standard edition"

SAP Build Work Zone – Standard Edition Roadmap
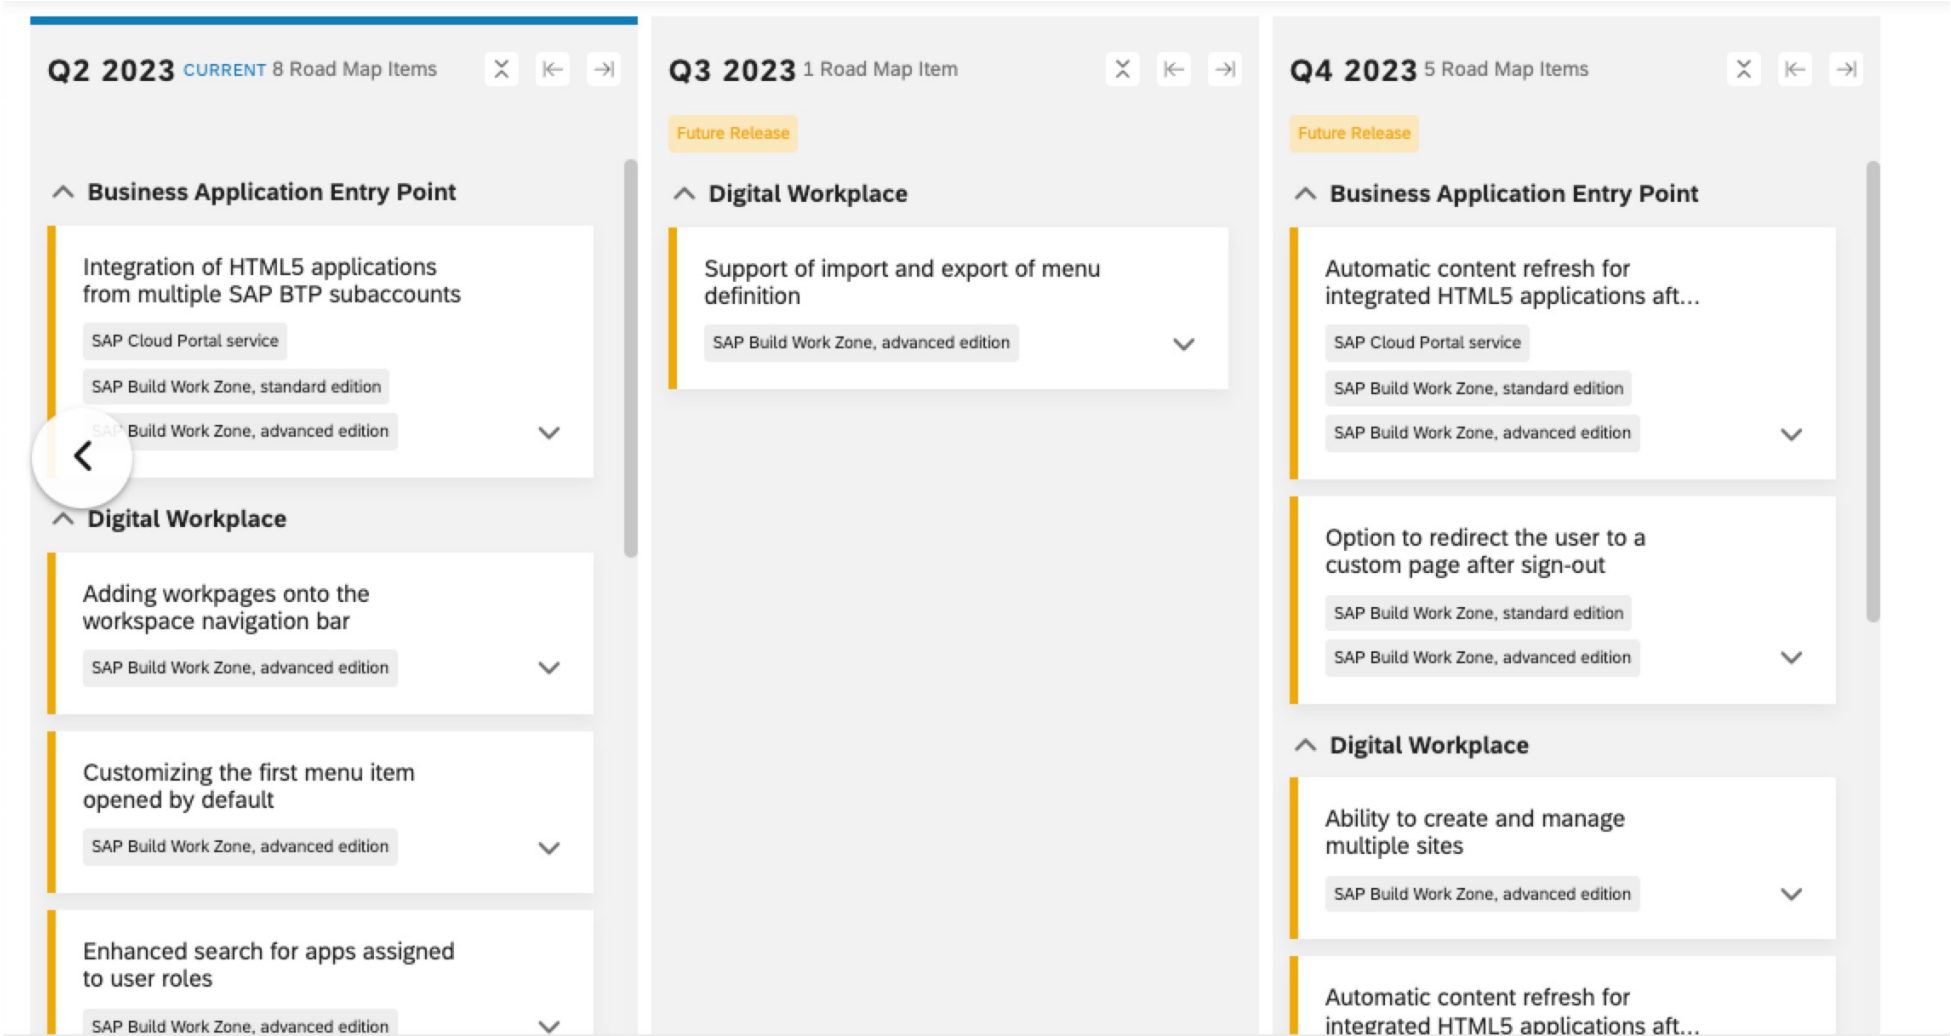

SAP Build Work Zone – Advanced Edition

- SAP Build Work Zone, advanced edition (formerly known as SAP Work Zone) extends the standard edition by empowering business users to build & publish content, integrate unstructured content and leverage premium pre-packaged SAP content.

SAP Build Work Zone – Home Page Sample

SAP Build Work Zone – Advanced Edition Roadmap

SAP Build Work Zone – Main Use Cases

- SAP Build Work Zone, standard edition offers capabilities for customers asking:

  - for a **central access point** to multiple SAP cloud & on-premise systems, e.g. SAP S/4HANA cloud and on-premise

  - to **extend & customize the product** (e.g. branding, translation, shell plug-ins, domains URL)

- SAP Build Work Zone, advanced edition offers **additional capabilities** for customers asking:

  - for a digital experience solution **bringing together business processes together with unstructured content** (documents, videos, knowledge bases, etc.).

  - to extend the standard edition with unstructured content and allow **business users to create & publish content** (delegate content creation to business users).

  - for enhanced capabilities for content management, web content, team **workspaces** and integration with 3rd party solutions (e.g. MS Teams)

SAP Build Work Zone – Differences with SAP SuccessFactors Work Zone

- When purchasing SAP solutions, our customers prefer different commercial options depending on their use cases and adoption plans. That's why SAP offers flexible pricing models including consumption-based and subscription-based contracts, and packaged solutions for selected scenarios.

  - SAP Build Work Zone, advanced edition is available for **consumption-based** model and can be activated and used right away in SAP BTP accounts with valid Cloud Platform Enterprise Agreement or Pay-as-you-go option

  - SAP SuccessFactors Work Zone is a dedicated solution bundle **with user-based subscription** model. The package includes SAP Build Work Zone, advanced edition, plus several SAP BTP services (such as SAP Business Application Studio, Workflow service, Custom Domain). It includes the same feature set as the regular SAP Build Work Zone, advanced edition.

- Can customers with a license for SAP Build Work Zone (standard or advanced edition) get access to the HR / SuccessFactors content package? Starting from January 2023 the HR content package for SAP SuccessFactors Work Zone is available also with SAP Build Work Zone, advanced edition.

SAP Build Work Zone – Future of SAP Enterprise Portal, SAP Cloud Portal and SAP JAM

- **SAP Enterprise Portal on SAP NetWeaver 7.5**: SAP announced the extension of the mainstream maintenance of SAP NetWeaver 7.5 to be continued to the end of 2027 (aligned with SAP Business Suite), with extended maintenance to 2030. As a general strategic approach, we recommend to transition your SAP Enterprise Portal use cases to SAP Business Technology Platform (SAP BTP), multi-cloud environment.

- **SAP Cloud Portal Service**: Existing Cloud Portal service customers can continue using the service (on Neo and CF environment), there is no end-of-maintenance date for Cloud Portal service. Freestyle sites are not planned to be enhanced anymore. We recommend existing customers to evaluate a transition to SAP Build Work Zone:
  - Customers who implemented the launchpad site template (on the multi-cloud environment of SAP BTP) could consider a transition to SAP Build Work Zone, standard edition
  - Customers who implemented freestyle sites could consider a transition to SAP Build Work Zone, advanced edition. You should take into account that there is no 1:1 equivalent between freestyle sites and SAP Build Work Zone, advanced edition capabilities.
  - New customers are advised to start projects with SAP Build Work Zone standard or advanced edition.

- **SAP Jam Collaboration** is no longer available for purchase and is in maintenance mode, with the plan to sunset the product by January 2027. It remains fully supported in accordance with existing cloud contracts.

Thank you.
